About TREQA

At TREQA our mission is simple:
to provide high quality outdoor apparel that is reasonably priced
so people can enjoy the outdoors.
We make our jackets and pants in Nepal because we love it there,
we love the Nepali people, and we want to help them improve the
quality of their lives.
Our motto is “Follow No One”, but it’s more than a company
slogan. It’s a philosophy we live by and a principle that guides
us. It’s a way of life. To us, it means “follow your own path, make
life an adventure, and don’t let anyone tell you what you can or
cannot do.”
So if you connect with what we are doing, then we hope you’ll
become a part of the TREQA family.

Sincerely,
TREQA Founders
Patrick Grillo and Yvan Nolet

DESIGNED FOR FAMILIES,
ENGINEERED FOR THE OUTDOORS.

Our Down-Free Promise

TREQA™ is committed to using only 100% cruelty-free, hypoallergenic, vegan friendly, down-free alternatives in our winter jackets and other outdoor apparel, and our promise to you is that NO animal will ever be hurt in our pursuit of providing you with high quality, affordable performance outerwear so you and your family can enjoy spending time outside.

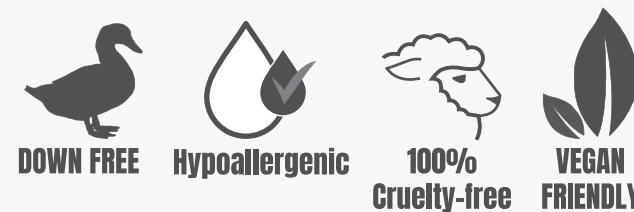

When it comes to insulated winter jackets, most people think of a down jacket as providing the highest level and quality insulation, but there are several reasons why down is not the ideal insulation for warm winter clothing.

On the practical side, down loses its insulating properties when it gets wet – even the moisture produced by sweat can reduce the insulating quality of down-filled clothing. And when you are spending time outdoors you need your warm winter clothing to stay warm despite the conditions!

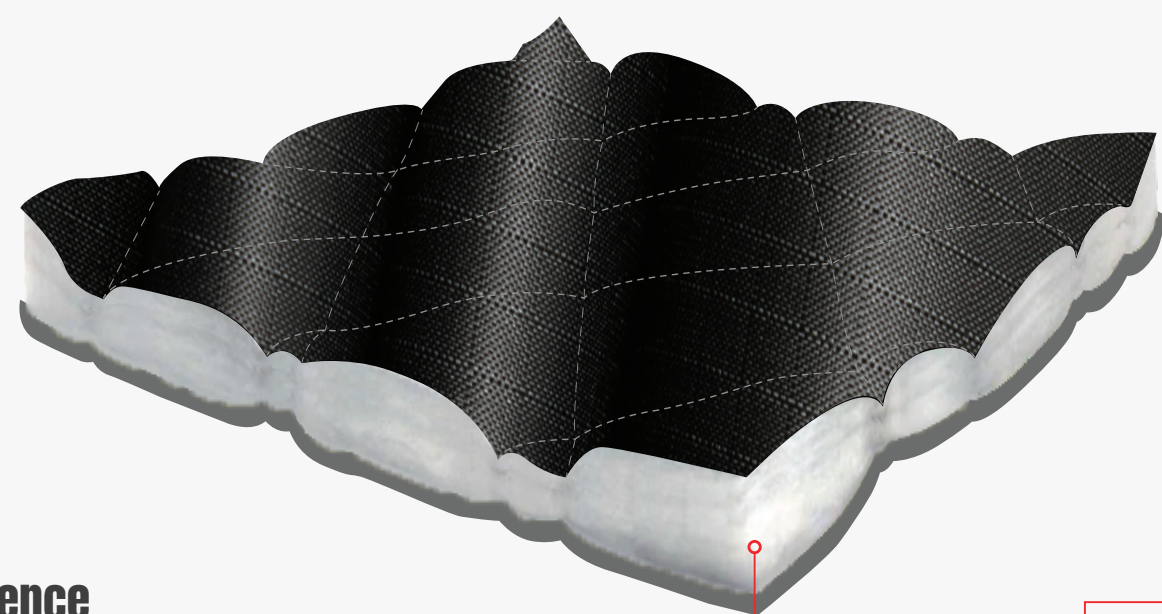

Besides staying warm, synthetic insulation materials are also easier to clean and last longer than down which typically loses its “fluff” after a certain period of time.

Furthermore, many people are allergic to down and other bird feathers and cannot wear down-filled jackets. For those people synthetic, hypoallergenic clothing is an absolute must.

Down-free
100% Cruelty-free
Hypoallergenic
Vegan-friendly

THE DIFFERENCE IS THE HEAT RETENTION

Feel the difference

TREQA uses only tight-weave sheet insulation in our jackets. Why? Because sheet insulation provides you with coverage that's both consistent and lightweight, by preventing heat-loss at stitched seams, and staying put - it won't shift or clump like down or other insulations.

Our insulation is cut in full sheets and sewn into our garments - so there are never any pockets without insulation, even after washing; everything stays put.

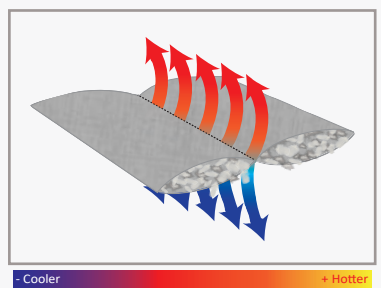

COMPETITOR VS TREQA

HEAT LOSS COMPARISON:
We took a competitors jacket under thermal view (left) and tested it against our own jacket (right). The bright areas are depicting heat-loss at the stitching, so those are areas with no insulation! With blown insulation into each stitched pocket, it's easy to see how heat-loss can occur.

OTHERS

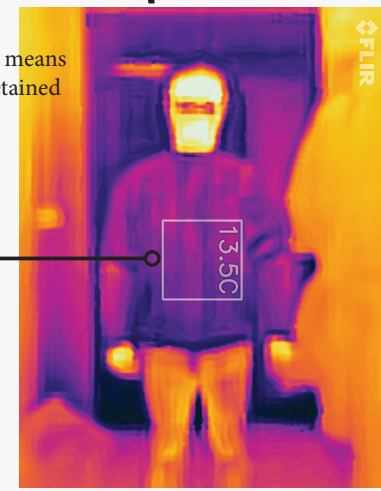

The bright yellow coloured areas (hot spots) in the photos show where heat is being lost through the jacket. A higher temperature means you are losing heat and warmth.

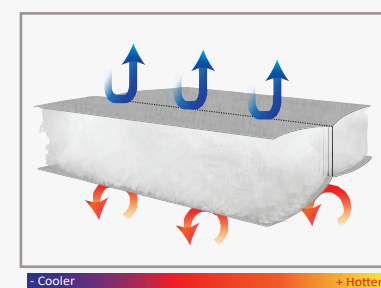

Compared to the TREQA jacket, where we use only sheet insulation, no bright areas means no cold spots so you've got thorough coverage and no gaps for heat-loss to occur.

TREQA

A lower temperature means more heat is being retained to keep you warm.

TREQA's synthetic insulation

Khumbu 100GSM

Dablam 150GSM

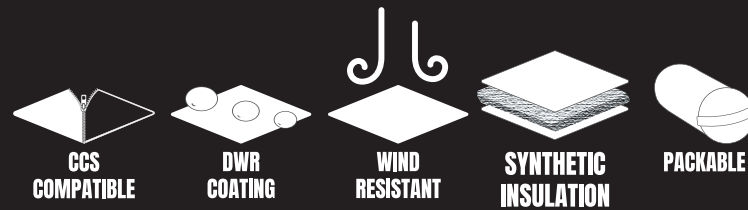

Pumori 200GSM

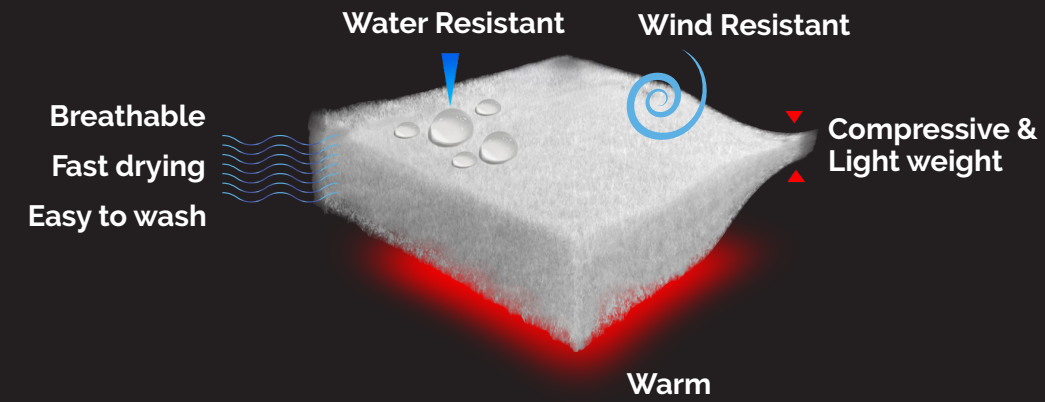

Langtang 250GSM

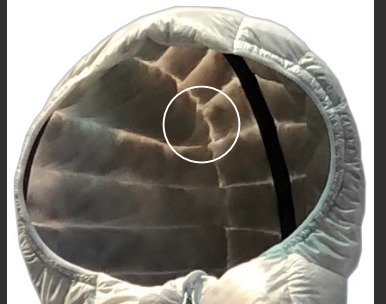

Annapurna 300GSM

Synthetic insulation

Displacement

- Prone to cold spots
- Cruelty to animals
- Not water Resistant
- Loses insulating ability when wet
- Takes a long time to dry out when wet
- Difficult to wash

Down

At **TREQA**, we've got options! So when picking your jacket, it's important to consider your activity level as much as your day-to-day personal comfort and body temperature. If you're normally warm all the time, you may prefer a jacket with breathability to allow heat out - or perhaps our under-arm vent zips feature will be the perfect solution.

From polar fleece inner-layers, and wind-resistant fabrics, to front zippers with storm-flaps that ensures the rain stays out. Our lightweight fabrics and packability make any **TREQA** jacket compact enough to carry on any adventure. Check the hangtags to find the options that are a fit for you.

Customize your comfort

The sleeves of our CCS inner layers are all embroidered with their insulation rating so you know exactly what warmth level at a glance.

TREQA's CCS inner layers come in a variety of insulation ratings that can be purchased individually to suit your needs. Allowing you to customize your comfort and create the perfect jacket. The CCS Inner layers currently include:

Please keep in mind that this is merely a guide -- it's an average and a starting point to consider. Comfort level will vary between individuals, depending on the activity the individual intends to engage in, and can also vary depending on the options available in your jacket.

**GSM is the weight of insulation, measured in grams per square meter.

Did you know? Our jackets pack up light and compact for any adventure! All of our jackets come with a handy packing pouch, allowing you to stuff and store your jacket for travel, taking along an extra layer in your backpack, or to save space in your closet.

Climate Compatible System™

CCS

Interchangeable Jacket system

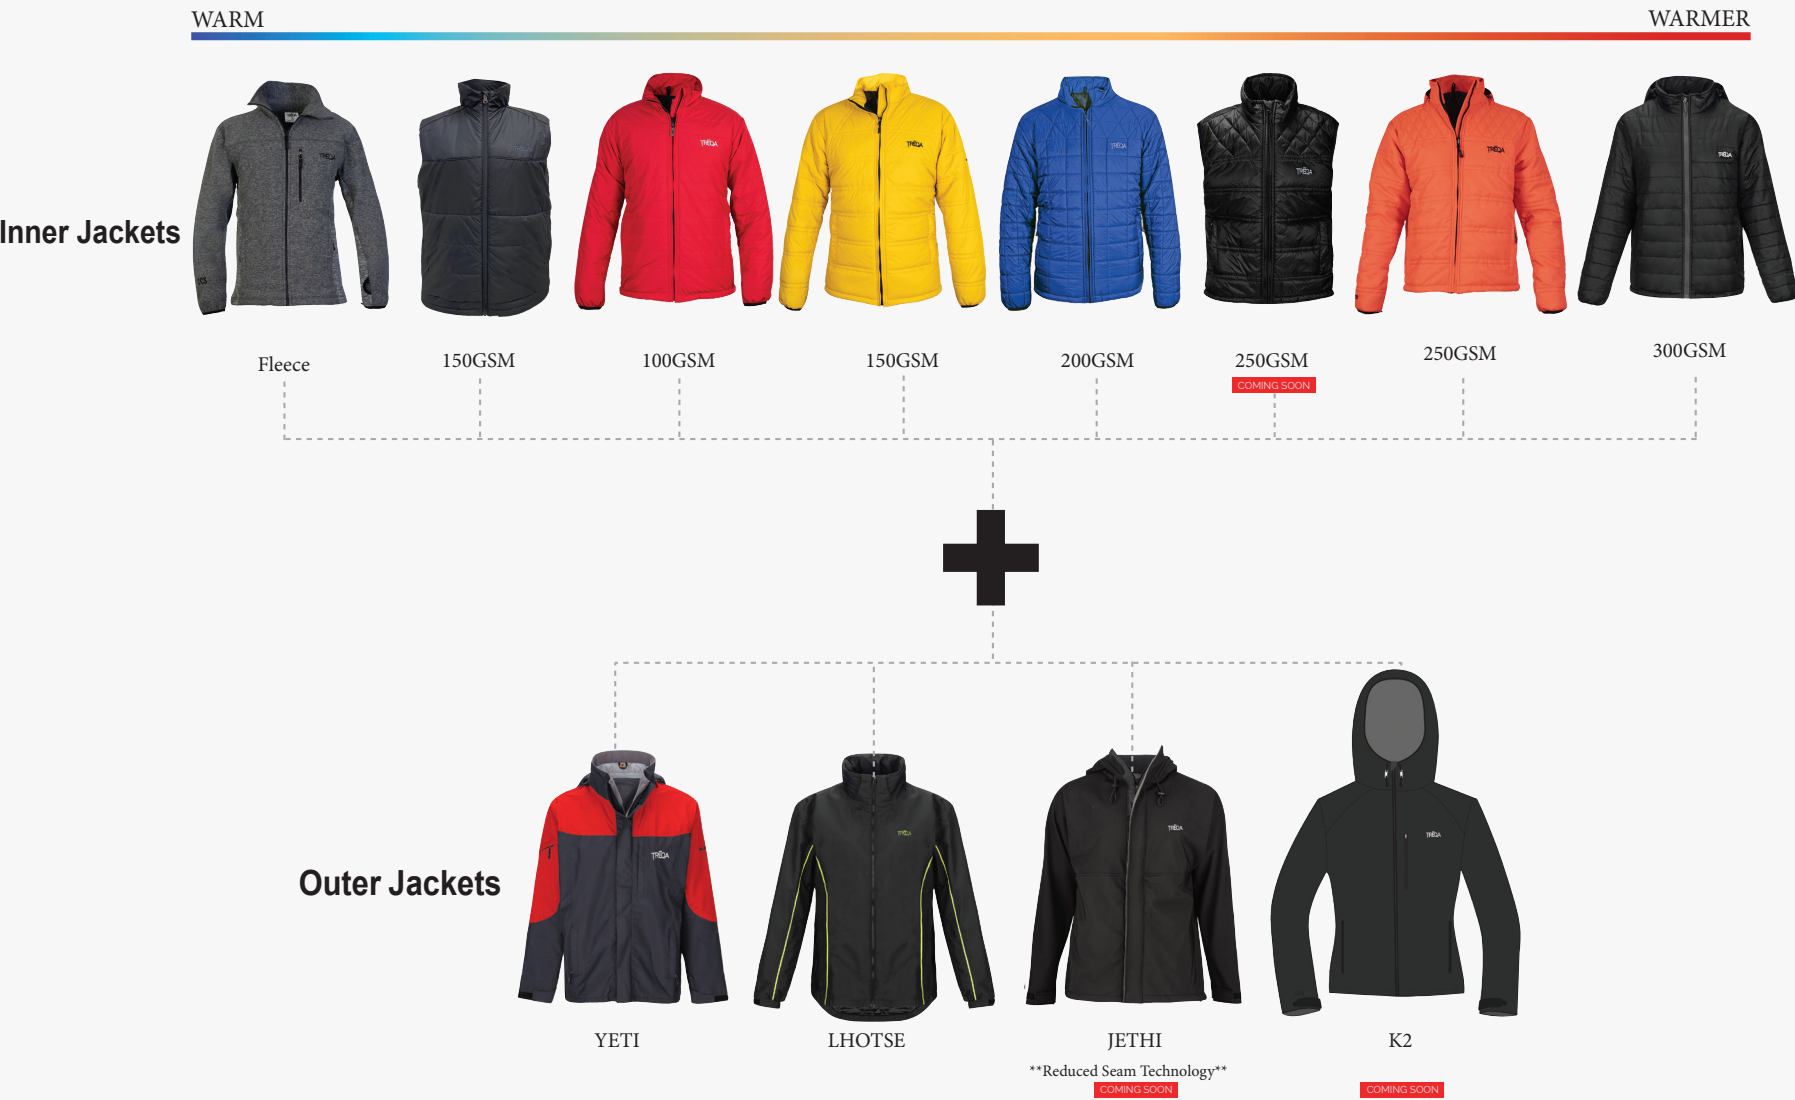

The weather may be unpredictable, but you are always prepared with the Climate Compatible System™ from **TREQA**. Introducing our versatile 7-in-3 outer jackets, able to adapt to every weather condition, every activity and every individual.

At **TREQA** we are dedicated to the relentless pursuit of quality, durability and functionality and we believe that you should not have to sacrifice any of those traits just to have an affordable jacket. Designed and tested on our own adventures, we have created jackets that we are proud to have our friends and family wear – and now we’re bringing them to you.

The **TREQA Climate Compatible System™ (CCS)** is a complete 7-in-3 system, combining a 100% waterproof, breathable outer shell with a variety of inner ‘liner’ layer options, in order to create a perfectly customized outerwear solution for absolutely every individual, in every season.

The **Climate Compatible System™** allows you to create your own ‘perfect pairing’ to help you stay warm and dry in almost any weather condition. The outer shell alone will keep you dry on those rainy springtime walks, while pairing the shell with a 100 GSM layer is perfect for cool fall hikes. The outer shell and each inner layer can be worn individually or combined for added protection from the elements.

Climate Compatible System™

MEN'S INNER JACKETS

Dablam 150GSM

Cho-oyu

The Cho-oyu is 6th highest mountain in the world at 8188 m above sea level. It's situated 20 km west of Mount Everest. It means turquoise goddess in Tibetan. Part of the Climate Compatible System

*Comes in Compression sack

Ultralight Brushed Fleece Toque

This one size fits all brushed fleece toque is warm, breathable and repels moisture (it holds less than 1% of its weight in water).

Brushed Fleece is amazingly effective at trapping heat, dries quickly and it is also machine washable. Made with 100 % polyester fabric.

Designed for Families Engineered for outdoors

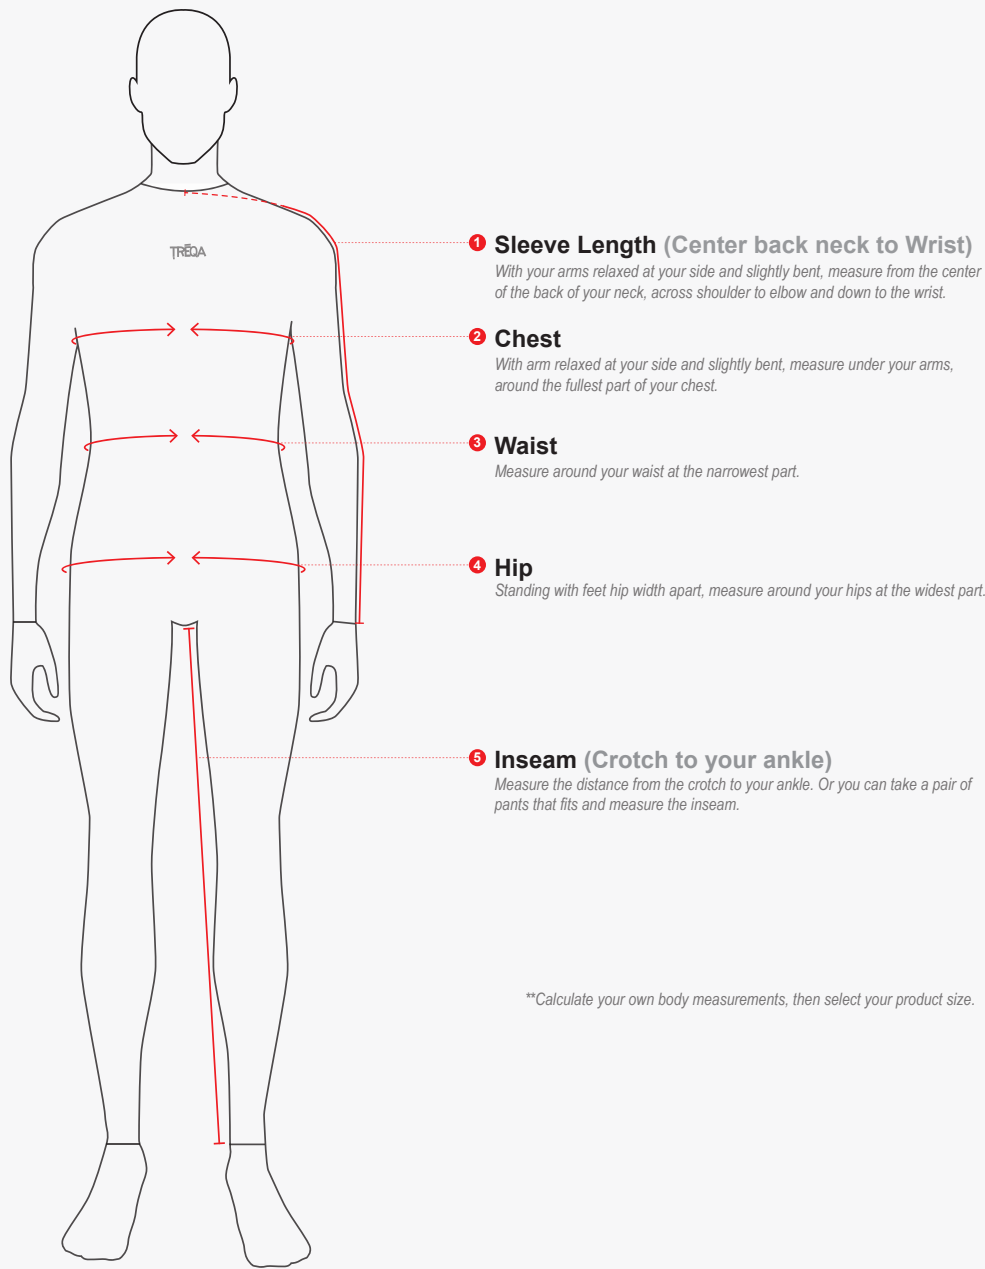

Our commitment to providing you with high performance outdoor apparel means our jackets have superior heat retention without adding extra weight.

Our **TREQA** Jackets are made with high-quality synthetic insulation which was developed for military applications. It is light-weight and does not absorb water. The synthetic microfibers are so small and the loft so high that it mimics down in its ability to retain heat without any of the disadvantages inherent in down insulation. We don't sacrifice quality for cost.

- Our insulation is cut in full sheets and sewn into our garments. so there are never any pockets without insulation, even after washing ; everything stays put.
